# KVH AgilePlans® ONE Activation Service Order

## 37cm, 60cm & 1m Systems

### 9. Installation Plan Information

KVH requires Subscriber to complete and submit the "AgilePlans Site Survey - TracPhone" available at [www.kvh.com/APsitesurvey](http://www.kvh.com/APsitesurvey). KVH will use the survey data to develop the mandatory "KVH Authorized Installation Plan". Allow 2-3 business days for processing.

#### KVH Authorized Installation Plan

KVH will utilize the subscriber-provided Site Survey data to develop the vessel's "KVH Authorized Installation Plan". This installation plan consists of deck plans, recommended antenna location, belowdecks equipment location, tracking avoidance zones, cable runs, and network diagram.

KVH uses the installation plan to instruct the crew on cable runs and pedestal placement. This same information will also be used by the KVH-selected installing technician for final commissioning.

# KVH Airtime Activation Terms & Conditions

## General / Airtime Services

- All services and plans are subject to the KVH Master Services Agreement.
- KVH global HTS network published throughput data rates are rate plan maximums and may vary in different regions and under different conditions. Service reception may be affected by environmental or operational conditions and uninterrupted availability is not guaranteed.
- Shaped High-Speed Plans automatically shift to the shaped data rate when the plan allowance has been used; the data rate will revert to high-speed on the first day of the following month. If data usage significantly exceeds the data allotment for consecutive months, upgrading to a higher plan may be required to maintain service.
- Pooling of Metered High-Speed Plans requires a minimum of 10 vessels, all of which must have the same antenna type and subscribe to the same plan. They must be billed on the same corporate account. Each vessel contributes the data allotments included in their plan to share among members of the pool. Charges and data allotments for mid-month additions and terminations are prorated.
- KVH must secure a license from the Brazilian regulator, ANATEL, on behalf of each KVH global HTS network Subscriber operating a vessel in Brazil territorial waters. The license application process includes the payment of two fees by KVH, one for the Annotation of Technical Responsibility (ART) (currently in an amount of approximately BRL 70) and another for the Installation Inspection Fee (currently in the amount of BRL 3,352). Subscriber will reimburse the amounts paid by KVH in equivalent USD, which will be included in the invoice(s) that follow ANATEL's licensing. Assuming prompt completion of the Installation Inspection, the issuance of the license by ANATEL is expected to occur approximately thirty (30) days following Subscriber's delivery of this Service Order to KVH, duly completed, and executed by the Subscriber.
